

## CONTENTS

Preface.....	xi
HENDRICKS, PEDERSEN AND JØRGENSEN / Introduction.....	1

## PART 1. REVIEW OF PROOF THEORY

SOLOMON FEFERMAN / Highlights in Proof Theory.....	11
1. Review of Hilbert's Program and Finitary Proof Theory.....	11
2. Results of Finitary Proof Theory via Gentzen's L-Calculi.....	14
3. Shifting Paradigms.....	21
4. Countably In-finitary Methods (Getting the Most Out of Logic)...	25
Notes.....	29
References.....	29

PART 2. THE BACKGROUND OF HILBERT'S  
PROOF THEORY

LEO CORRY / The Empiricist Roots of Hilbert's Axiomatic Approach	35
1. Introduction.....	35
2. Heinrich Hertz.....	35
3. Carl Neumann.....	39
4. Paul Volkman.....	42
5. Physics and Geometry in Hilbert's Early Courses.....	44
6. <i>Grundlagen der Geometrie</i> and its Aftermath.....	45
7. Concluding Remarks.....	50
Notes.....	51
References.....	52
DAVID ROWE / The Calm Before the Storm: Hilbert's Early View on Foundations.....	55
1. Hilbert's Early Career.....	56
2. Hilbert's <i>Grundlagen der Geometrie</i> .....	63
3. Hilbert's Axiomatic Method and Frege's Critique.....	71
4. Hilbert's Return to Foundations.....	83
Notes.....	87
References.....	88
WILFRIED SIEG / Toward Finitist Proof Theory.....	95

1. Introduction .....	95
2. Background .....	96
3. Mathematical Logic .....	98
4. Constructive Number Theory .....	101
5. Finitist Proof Theory .....	103
6. Remarks and Issues .....	106
Notes .....	108
References .....	110

PART 3. BROUWER AND WEYL ON PROOF THEORY  
AND PHILOSOPHY OF MATHEMATICS

DIRK VAN DALEN / The Development of Brouwer's Intuitionism ....	117
1. Mysticism and the Dissertation .....	117
2. Issues and Topics in the Dissertation .....	124
3. Place and Function of Logic .....	128
4. The Introduction of Choice Sequences .....	135
5. The Impact of the Grundlagenstreit .....	144
Notes .....	148
References .....	149
MORITZ EPPLE / Did Brouwer's Intuitionistic Analysis Meet its own Epistemological Standards? .....	153
1. Introduction .....	153
2. Some Comments on the Epistemological Standards of Intuitionism .....	160
3. The Problem of Solving the Fan Theorem .....	161
4. Epistemological Discussion .....	166
5. Historical Discussion .....	169
6. Conclusion .....	172
Notes .....	173
References .....	176
SOLOMON FEFERMAN / The Significance of Herman Weyl's <i>Das Kontinuum</i> .....	179
1. Weyl's System Reconstructed .....	187
2. Examples of Theorems .....	192
3. Limitations of Weyl's System .....	192
Notes .....	193
References .....	193
ERHARD SCHOLZ / Herman Weyl on the Concept of Continuum ....	195

1. Introduction .....	195
2. Two Different Continuum Concepts, 1918 and 1920/21 .....	195
3. Space made up from Infinitesimally Small Parts .....	200
4. Digression: Purely Infinitesimal Geometry and Field Theoretic Matter Explanation.....	202
5. Free Emergence in a Combinatorially Specified Framework.....	204
6. Problems for Weyl's Semi-Intuitionistic Approach to Manifolds ..	206
7. Symbol Systems and Transcendent/ Transient Reality.....	209
Notes .....	212
References .....	214

#### PART 4. MODERN VIEWS AND RESULTS FROM PROOF THEORY

SOLOMON FEFERMAN / Relationships between Constructive, Predicative and Classical Systems of Analysis .....	221
1. Informal Mathematical Part .....	221
2. Metamathematical Part.....	229
Notes .....	235
References.....	235
Index .....	237
