P. MANCOSU, K.F. JØRGENSEN AND S.A. PEDERSEN / Introduction . . .	1
PART I. MATHEMATICAL REASONING AND VISUALIZATION	
P. MANCOSU / Visualization in Logic and Mathematics	13
1. Diagrams and Images in the Late Nineteenth Century	13
2. The Return of the Visual as a Change in Mathematical Style	17
3. New Directions of Research and Foundations of Mathematics . . .	21
Acknowledgements	26
Notes	27
References	28
M. GIAQUINTO / From Symmetry Perception to Basic Geometry	31
Introduction	31
1. Perceiving a Figure as a Square	31
2. A Geometrical Concept for Squares	39
3. Getting the Belief	44
4. Is It Knowledge?	46
5. Summary	50
Notes	51
References	53
J.R. BROWN / Naturalism, Pictures, and Platonic Intuitions	57
1. Naturalism	57
2. Platonism	59
3. Gödel's Platonism	60
4. The Concept of Observable	62
5. Proofs and Intuitions	64
6. Maddy's Naturalism	66
7. Refuting the Continuum Hypothesis	67
Acknowledgements	70
Appendix: Freiling's "Philosophical" Refutation of CH	71
References	72

M. GIAQUINTO / Mathematical Activity	75
1. Discovery	76
2. Explanation	77
3. Justification	81
4. Refining and Extending the List of Activities	84
5. Concluding Remarks	86
Notes	86
References	87

PART II. MATHEMATICAL EXPLANATION AND PROOF STYLES

J. HØYRUP / Tertium Non Datur: On Reasoning Styles in Early Mathematics	91
1. Two Convenient Scapegoats	91
2. Old Babylonian Geometric Proto-algebra	92
3. Euclidean Geometry	103
4. Stations on the Road	105
5. Other Greeks	107
6. Proportionality – Reasoning and its Elimination	109
Notes	113
References	118

K. CHEMLA / The Interplay Between Proof and Algorithm in 3rd Century China: The Operation as Prescription of Computation and the Operation as Argument	123
1. Elements of Context	125
2. Sketch of the Proof	126
3. First Remarks on the Proof	131
4. The Operation as Relation of Transformation	132
5. The Essential Link Between Proof and Algorithm	134
6. Conclusion	139
Appendix	141
Notes	141
References	144

J. TAPPENDEN / Proof Style and Understanding in Mathematics I: Visualization, Unification and Axiom Choice	147
1. Introduction – a “New Riddle” of Deduction	147
2. Understanding and Explanation in Mathematical Methodology: The Target	149
3. Understanding, Unification and Explanation – Friedman	158
4. Kitcher: Patterns of Argument	168
5. Artin and Axiom Choice: “Visual Reasoning” Without Vision ..	180
6. Summary – the “new Riddle of Deduction”	187
Notes	188
References	206
J. HAFNER AND P. MANCOSU / The Varieties of Mathematical Explanations	215
1. Back to the Facts Themselves	215
2. Mathematical Explanation or Explanation in Mathematics? ...	216
3. The Search for Explanation within Mathematics	218
4. Some Methodological Comments on the General Project	221
5. Mark Steiner on Mathematical Explanation	222
6. Kummer’s Convergence Test	224
7. A Test Case for Steiner’s Theory	230
Appendix	241
Notes	246
References	249
R. NETZ / The Aesthetics of Mathematics: A Study	251
1. The Problem Motivated	251
2. Sources of Beauty in Mathematics	254
3. Conclusion	281
Notes	289
References	292
Index	295
